

Name _____ Grade _____

Following Directions

A. Write the directions on the compass.

B. Sam and Peter are scouts. They went to a camp to get a training of walking through the forests. They were taken to a rocky surface in a forest and given the following instructions based on which they had to complete their journey.

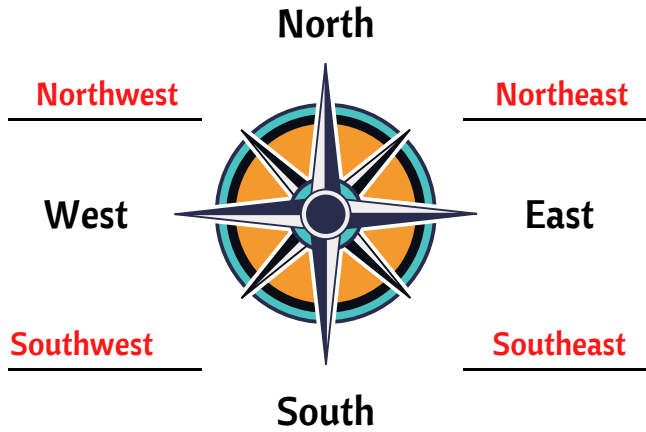

1. After traveling 500 m towards the east of the rocky surface, you will come across a footbridge that lies across a stream.
2. After crossing the footbridge, and traveling 800 m towards the northeast, you will come across a waterfall.
3. When you travel a distance of 600 m from the waterfall towards the southeast, you will come across a big tree.
4. When you travel 750 m towards the southwest from the tree, you will come across a cave.
5. By traveling 800 m from the cave towards the north-west you will return to the camp.

Based on the information that has been provided to the above kids, draw a rough diagram of the path that they should take.
